SUMMARY

Data Analyst and BI Professional with 4+ years of experience analyzing claims, financial, operational, and transactional data using SQL, Python, Power BI, SAS, and Excel. Experienced in gathering reporting requirements, identifying data gaps and anomalies, validating data integrity, defining KPI standards, and documenting reporting logic. Skilled at translating complex data into clear, actionable insights that support accurate reporting, efficient operations, and informed business decisions.

Technical Skills

Data Analysis & Reporting: SQL, Python, SAS, Advanced Excel, Descriptive Statistics, Trend Analysis, Regression, Anomaly Detection, Financial and Operational Analysis

SQL & Data Management: SQL Server, T-SQL, Snowflake, Complex Joins, CTEs, Window Functions, Subqueries, Stored Procedures, Query Optimization, Relational Data Modeling

Business Intelligence & Visualization: Power BI, DAX, Tableau, SAP Business Objects, SSRS, KPI Dashboards, Drill-Through Reporting, PowerPoint

Data Quality & Governance: Data Validation, Data Integrity, Data Quality Analysis, Data Lineage, Source-to-Target Mapping, KPI Standardization, UAT, Reporting Requirements Gathering, Technical Documentation

Data Engineering & Tools: AWS Glue, Amazon S3, Azure Databricks, Informatica, ETL Pipelines, Azure DevOps, Jira, Confluence, Git

Experience

Fraud Data Analyst / *Likewise Corp* / *Southlake, TX*

May 2025 – Mar 2026

- Developed complex **SQL** queries against fraud, claims, and device-return databases to support **Tableau** and **Power BI** dashboards covering fraud trends, processing volumes, operational KPIs, and risk exposure across multiple business lines.
- Built **Tableau** and **Power BI** dashboards covering claim outcomes, fraud rates, processing volumes, operational backlogs, and risk exposure for operations managers and senior leadership.
- Applied **Python (Scikit-learn)** regression and classification models to 1M+ records, using feature analysis to identify high-risk drivers, improving anomaly detection accuracy by **30%** and reducing manual review volume by **~40%**.
- Validated dashboard and model outputs through **UAT** with end-users and IT teams, documented metric and model definitions in Confluence, and upskilled 10+ stakeholders on risk data interpretation and tool usage.
- Developed an **AWS Lambda** function integrated with **AWS Connect** to trigger real-time alerts on high-risk claims, automating a manual escalation step and leveraging **GitHub Copilot** in VS Code throughout Lambda and SQL development.

Data Engineer / *Vsion Technologies* / *Cedar Park, TX*

Dec 2024 – May 2025

- Converted 5+ manual retail reports into **Snowflake** SQL views and scheduled **Power BI** dashboards, validating outputs against historical data across multiple periods before cutover and reducing reporting discrepancies by **90%**.
- Wrote **T-SQL** and Snowflake queries using CTEs, window functions, and multi-table joins across 10M+ daily transactions to surface inventory, sales, and fulfillment trends for business partners.
- Standardized KPI logic and field definitions across 4+ dashboards in **Confluence**, aligning marketing, operations, and finance teams on a single reporting layer and reducing reconciliation requests.

Business Systems Analyst / *Quarterhill* / *Louisville, KY*

Feb 2024 – Apr 2024

- Partnered with senior stakeholders to gather and translate revenue, budget, and compliance reporting requirements into **SQL** datasets, **Power BI** dashboards, and **SSRS** reports while managing delivery across multiple concurrent Agile sprints.
- Analyzed more than 3 million transaction records using **SQL**, trend analysis, and budget-to-actual variance reporting to identify revenue leakage and operational inefficiencies, improving resource allocation efficiency by 25% through data-driven insights.

Data Analyst / *University of Louisville* / *Louisville, KY*

Aug 2023 – Feb 2024

- Built **SQL Server** data models and **Tableau** ERP reporting pipelines across 5 departments, reducing order processing time by **35%** and cutting ad hoc data requests by **50%** through self-service dashboards with standardized KPIs.
- Automated recurring Excel reports using **VBA macros**, eliminating **15+** hours of monthly manual effort across departmental reporting cycles.

Business Data Analyst / *Accenture* / *Bengaluru, India*

Jun 2021 – Jul 2023

- Wrote **SQL** queries, stored procedures, and reusable reporting views across 10+ financial-services and retail engagements spanning financial systems, CRM, sales, and procurement, reducing manual reporting cycles by **40%**.
- Built **Tableau** and **SAP Business Objects** dashboards for client leadership on top of **Snowflake** datasets sourced through **Informatica** ETL workflows, documenting source-to-target mappings and field definitions to support ongoing report maintenance and reducing data discrepancies by **20%**.

Education

M.S. in Business Analytics University of Louisville, Louisville, KY

Aug 2023 – Aug 2024

B.Tech in Electronics & Communications Dayananda Sagar University, Bengaluru, India

Aug 2017 – May 2021
