SUMMARY

Business Intelligence and Data Analyst with 4+ years of experience building scalable reporting tools, data products, and operational metrics across Insurance, Fintech, and Retail. Expert in SQL and Tableau, with strong experience transforming complex datasets into actionable insights and compelling data stories that support executive decision-making. Proven ability to connect and analyze data across multiple sources, ensure data accuracy and governance, and deliver business-driven analytics solutions for cross-functional stakeholders.

TECHNICAL SKILLS

Visualization & BI: Tableau (Desktop, Server, Cloud, Tableau Pulse), Power BI (DAX, KPI Dashboards, Drill-Through), SSRS, Google Analytics (GA4), Advanced Excel (VBA, Macros), Alteryx

SQL & Databases: SQL Server, T-SQL, PL/SQL, CTEs, Window Functions, Query Optimization, Snowflake, Salesforce Data Models & Reporting Objects, Relational Data Modeling

Programming & ETL: Python (Pandas, NumPy, Scikit-learn, Predictive Modeling), ETL Pipelines, Informatica, AWS Glue, Azure Databricks, Azure DevOps

Tools & Methods: KPI Tracking, Agile/Scrum, Data Storytelling, Enablement Analytics, Jira, Confluence, Data Governance, Requirements Documentation, Git

EXPERIENCE

Fraud Analyst | Likewise Corp | Southlake, TX

May 2025 – Mar 2026

- Designed and maintained Tableau dashboards by integrating data from multiple internal systems, translating complex datasets into clear visual stories on KPI performance, fraud trends, and operational metrics to support executive decision-making.
- Maintained scalable SQL Server reporting datasets with full field-level lineage documentation, cutting data discrepancy rates by 25% and ensuring accuracy and governance across all published dashboards.
- Developed rule-based SQL detection logic connecting data across multiple source systems, reducing high-risk claim approval rates by ~18% and enabling faster, more confident decisions by operations leadership.
- Applied predictive modeling in Python on 1M+ records to surface forward-looking insights supporting proactive decision-making, improving anomaly detection accuracy by 30% and reducing manual review queues by ~40%.
- Collaborated with the data engineering team to design and implement ETL workflows using AWS Glue and Azure Databricks, enabling reliable data integration and improving the quality and availability of datasets for reporting and analytics.
- Validated dashboard outputs through UAT with end-users and IT teams, documented metric definitions in Confluence, and upskilled 10+ stakeholders on Tableau usage and data literacy best practices.

Data Engineer | VSION Technologies | Cedar Park, TX

Dec 2024 – May 2025

- Analyzed 10M+ daily retail transactions using T-SQL to surface financial risk patterns and data anomalies, reducing reporting errors by 30%; documented KPI definitions and transformation logic in Confluence for team-wide alignment.
- Constructed ETL pipelines loading retail data into Snowflake and delivered automated dashboards that reduced financial reporting discrepancies by 90%, with full version control maintained via Azure DevOps.
- Spearheaded the transition from reactive snapshots to trend-driven, enablement-focused analytics, partnering with business teams to align 4+ dashboard outputs with strategic priorities.

Business Systems Analyst | Quarterhill | Louisville, KY

Feb 2024 – Apr 2024

- Gathered requirements from client, translated them into feature specs, and delivered Power BI and SSRS dashboards that gave leadership real-time visibility into revenue KPIs, compliance metrics, and program performance.
- Executed SQL-based trend analysis on 3M+ transaction records to identify revenue leakage patterns, driving a 25% efficiency improvement while upholding data governance standards across all reporting environments.
- Standardized metric definitions and maintained audit documentation across 5+ business units, supporting compliance reviews and enabling scalable, governed analytics for cross-functional teams.

Data Analyst | University of Louisville | Louisville, KY

Aug 2023 – Feb 2024

- Architected SQL Server data models and Tableau ERP reporting pipelines across 5+ departments, cutting order processing time by 35% and enabling department leads to make faster, data-informed planning decisions.
- Automated monthly reporting through Excel VBA macros, saving 15+ hours per month, proactively surfaced trends and anomalies in operational data to leadership to strengthen program performance and enablement outcomes.
- Collaborated with cross-functional stakeholders to define KPIs and deliver self-service Tableau dashboards, reducing dependency on manual data pulls by 50% and improving data accessibility organization-wide.

Business Data Analyst | Accenture | Bengaluru, India

Jun 2021 – Jul 2023

- Delivered Tableau KPI dashboards and data stories for 10+ stakeholders across 10+ client engagements, reducing manual reporting cycles by 40% by connecting and blending data from Financials, Sales/CRM, and procurement systems.
- Leveraged Informatica for ETL and data integration, documented source-to-target mappings across Salesforce and ERP systems, and reduced data discrepancy rates by 20% while ensuring accuracy and governance across the full SDLC.
- Translated complex business requirements into structured Tableau-ready data models and governed reporting assets for 10+ clients, ensuring long-term scalability, data accuracy, and consistent insights for executive audiences.

EDUCATION

M.S. in Business Analytics | University of Louisville, Louisville, KY

Aug 2023 – Aug 2024

B.Tech in Electronics & Communications | Dayananda Sagar University, Bengaluru, India

Aug 2017 – May 2021
