

AISHWARYA RAO

Irving, TX | arao1898@gmail.com | (502) 615-0617 | linkedin.com/in/aishwarya-rao1 | Portfolio

SUMMARY

Data Analyst with 5+ years of experience writing complex SQL, building Tableau and Power BI dashboards, and delivering statistical analysis on large datasets across financial services and retail. Skilled in Snowflake, AWS, Python, and SAP Business Objects, with a consistent focus on requirements gathering, data lineage documentation, and replacing manual reports with governed, cloud-based solutions. Experienced delivering in Agile environments and presenting findings clearly to both technical teams and business leadership.

Technical Skills

SQL & Data Warehousing: SQL Server, T-SQL, Snowflake, Complex Joins, CTEs, Window Functions, Subqueries, Stored Procedures, Query Optimization, Relational Data Modeling

Visualization & BI: Tableau (Desktop, Server), Power BI (DAX, KPI Dashboards, Drill-Through), SAP Business Objects, SSRS, Advanced Excel (VBA, Pivot Tables, VLOOKUP), PowerPoint

Programming & Analytics: Python (Pandas, NumPy, Scikit-learn), SAS, Descriptive Statistics, Regression, Classification, Model Evaluation, Anomaly Detection, Trend Analysis

Cloud & Data Engineering: AWS (Glue, S3), Azure Databricks, Informatica, ETL Pipelines, Data Lake Solutions, Azure DevOps, Power Automate

Governance & Methods: Data Lineage, Source-to-Target Mapping, KPI Standardization, Data Validation, Requirements Gathering, Legacy Reporting Migration, Agile/Scrum, Jira, Confluence, Git, GenAI & IDEs: GitHub Copilot, VS Code

EXPERIENCE

Fraud & Data Analyst / Likewize Corp / Southlake, TX

May 2025 – Mar 2026

- Developed complex **SQL** queries against fraud, claims, and device-return databases to support **Tableau** and **Power BI** dashboards covering fraud trends, processing volumes, operational KPIs, and risk exposure across multiple business lines.
- Built drill-through Tableau and Power BI reports with **DAX**-based KPI tiles, giving operations managers and senior leadership a consolidated view of claim outcomes, fraud rates, and processing backlogs.
- Applied **Python (Scikit-learn)** regression and classification models to 1M+ records, using feature analysis to identify high-risk drivers, improving anomaly detection accuracy by **30%** and reducing manual review volume by **~40%**.
- Maintained field-level **source-to-target lineage** documentation covering source systems, transformation rules, and business definitions, reducing discrepancies in published reports by **25%**.
 - Developed an **AWS Lambda** function integrated with Amazon Connect to trigger real-time alerts on high-risk claims, automating a manual escalation step and leveraging GitHub Copilot in VS Code throughout Lambda and SQL development.

Data Engineer / VSION Technologies / Cedar Park, TX

Dec 2024 – May 2025

- Converted 5+ manual retail reports into **Snowflake** SQL views and scheduled **Power BI** dashboards, validating outputs against historical data across multiple periods before cutover and reducing reporting discrepancies by **90%**.
- Wrote **T-SQL** and Snowflake queries using CTEs, window functions, and multi-table joins across 10M+ daily transactions to surface inventory, sales, and fulfillment trends for business partners.
- Standardized KPI logic and field definitions across 4+ dashboards in **Confluence**, aligning marketing, operations, and finance teams on a single reporting layer and reducing reconciliation requests.

Business Systems Analyst / Quarterhill / Louisville, KY

Feb 2024 – Apr 2024

- Gathered reporting requirements from senior stakeholders, translated them into **SQL** queries and **Power BI** and SSRS dashboards, and managed delivery across concurrent **Agile** sprints covering revenue, budget, and compliance reporting.
- Analyzed 3M+ transaction records using SQL aggregations, trend comparisons, and variance analysis to identify revenue leakage patterns, presenting findings that supported a **25%** improvement in resource allocation efficiency.

Data Analyst / University of Louisville / Louisville, KY

Aug 2023 – Feb 2024

- Built **SQL Server** data models and **Tableau** ERP reporting pipelines across 5 departments, reducing order processing time by **35%** and cutting ad hoc data requests by **50%** through self-service dashboards with standardized KPIs.
- Automated recurring Excel reports using **VBA macros**, eliminating **15+** hours of monthly manual effort across departmental reporting cycles.

Business Data Analyst / Accenture / Bengaluru, India

Jun 2021 – Jul 2023

- Wrote **SQL** queries, stored procedures, and reusable reporting views across 10+ financial-services and retail engagements spanning financial systems, CRM, sales, and procurement, reducing manual reporting cycles by **40%**.
- Built **Tableau** and **SAP Business Objects** dashboards for client leadership on top of **Snowflake** datasets sourced through

Informatica ETL workflows, documenting source-to-target mappings and field definitions to support ongoing report maintenance and reducing data discrepancies by **20%**.

Education

M.S. in Business Analytics	University of Louisville, Louisville, KY	<i>Aug 2023 – Aug 2024</i>
B.Tech in Electronics & Communications	Dayananda Sagar University, Bengaluru, India	<i>Aug 2017 – May 2021</i>
